Source: See "Thermal Conversion Factor Source Documentation," which follows this table.

 ^a Used as the thermal conversion factor for hydroelectric, solar, and wind electricity net generation.
^b Through 2000, heat rates are for electric utilities only. Beginning in 2001, heat rates are for the electric power sector, which comprises electricity-only and combined-heat-and-power (CHP) plants within the NAICS 22 category whose primary business is to sell electricity, or electricity and heat, to the public.
^c Used as the thermal conversion factor for nuclear electricity net generation.
^d Used as the thermal conversion factor for geothermal electricity net generation.

Used as the thermal conversion factor for geomermal electricity net generation.
Used as the thermal conversion factor for electricity retail sales, and electricity imports and exports.
